

Kick-off meeting of the new LNS Users Committee 2019/20 - 14 March 2019

Participants Tommaso Chiarusi, Marco La Commara, Lorenzo Manti, Tommaso Marchi, Giuseppe Politi.

The meeting opens with the election of the new coordinator; Committee unanimously confirms Giuseppe Politi in this role.

The committee decides that, in order to enhance the filling of satisfaction survey form, it will be asked to the spokespersons to send it, if not already done at the end of each experiment, coupled to a new experiment request. A survey form could also be envisaged for groups not directly working with accelerators (source development, KM3NeT) in order to have their feedback on the use of LNS facilities. This point will be discussed by the committee with the local spokes of these activities.

The discussion about LNS Users list ends with the indication to maintain the present updating based on new experiment request and following satisfaction survey for, and to explore the possibility of an automatic registration procedure to be done together with the periodic LNS access form presentation.

Next users meeting will be done in 2019, date and structure will be chosen in order to enhance the participation of external users, for instance by coupling it to some other event organized at the LNS.

Minutes of Users Committee meetings will be put on the LNS web site.

On behalf of the Users Committee

Giuseppe Politi
